Textbook: *Basic Mathematics, 10/e*, by Bittinger. All students must register for this course at MyMathLab.com using the Course ID: **toner79463**. Your textbook can be purchased new from the [VVC Rams Bookstore](#) (bundled with MyMathLab **at no extra charge**). Or, if you purchase a used textbook, access to MyMathLab can be procured online at www.mymathlab.com for approximately \$50. MyMathLab is a requirement for this online course.

Course Description: This course covers the basic operations applied to whole numbers, fractions (including mixed numbers) and decimals. Prime factorization, least common multiple, ratio and proportion, similar triangles, averages; graphs and tables, square roots, the Pythagorean theorem, measurement, operations on signed-numbers and solutions of simple linear equations are also covered.

Attendance Policy: It is your responsibility to keep your enrollment status current. You risk receiving an "F" if you decide to quit without officially withdrawing. You are responsible for checking the announcement page and discussion board regularly. All online homework assignments and exams **must** be submitted on or before posted due dates (as listed below).

A Note about calculators: Calculators are not allowed at any time in this course. While I cannot monitor what you are doing at home, you are on your academic honor not to be using one. If it is discovered that you are using one, it will be considered academic dishonesty and will be considered grounds for failure.

My Philosophy: Online math classes tend to be more difficult than traditional math classes because of the amount of reading involved and the absence of face-to-face communication. An online math class may also require **more time expenditure** because the student needs to obtain course materials and competency from a variety of sources, i.e., a required textbook or interactive multi-media textbook, video lectures, audio glossary, various web sites, practice exams, etc..

Online courses are not for everyone. They are intended for students who are unable, for various reasons, to attend class regularly in the traditional face-to-face setting. **If you are looking for an "easy way out" of the rigor found in the traditional classroom, this online class will not likely suit you.**

Learning involves interaction. To be successful in this course, it would be wise for you to devote an abundance of hours using all of the resources available to you. Do not forget that I am one of your major resources. Many students try to make this class into an independent study course, (unsuccessfully, I might add!). Please make every effort to watch the video lectures, as they are your primary means of instruction.

Grading Policies: Each chapter's online homework will count as 24 points toward your overall point total. (I will drop your lowest online HW chapter score before computing your grade.) To earn full participation points you need to log in to the website and do **some** HW at least 3 days each week (I can check your activity via my control panel.)

Online homework	– 24 points per chapter for 11 chapters (lowest score dropped)	240 points
Participation	– 3 points per week	48 points
Online Midterm Exam	– covering Chapters 1-5 due 10/14/07 by 11:59 PM	300 points
Online Final Exam	– covering Chapters 6-11.3 due 12/15/07 by 11:59 PM	300 points

Grading Scale **Total Points Possible: 888**

781 to 888 = A (88.00% or above)
 692 to 791 = B (78% - 79.99%)
 621 to 701 = C (70% - 77.99%)
 532 to 629 = D (60% - 69.99%)
 Below 532 = F

While students may work together on the researching of any assignment, it is expected that each of their writing assignments reflect substantial individual effort. Any student who commits plagiarism or is found to have **cheated on a scheduled exam** is subject to a zero score for that specific exam and **a term grade of "F" for this course**. Students should be aware that cases of cheating and/or plagiarism will be forwarded to the appropriate college administrator promptly. The college administration has a range of sanctions that may be imposed including, but not limited to, academic suspension or expulsion from the college.

Student Time Commitment: As per the fall 2007 schedule of classes,

“The hours/week arranged listed for online classes must be fulfilled through an arrangement established between the instructor and the student. They do not represent an increase in the total number of hours for an online class. Hours/week arranged do not have to be fulfilled by in-person class attendance. Consult with your instructor for information about fulfilling the hours/week arranged requirement.”

Here is how we will “meet” the 3.0 hours per week criterion:

(The following is just a technical justification of hours spent—your hours may vary)

In our class, there will be several forms of online instruction. Each section of the text has an online video lecture which lasts an average of 15 minutes. Each section of the online multimedia textbook contains “extras” such as “You Try It”, “Explore”, and “Video,” segments; you are expected to spend at least 15 minutes in each. (This is roughly 30 minutes per section of the text, of which there are 65 that you will cover this fall session. This amounts to **32.5 hours**, if you are counting!)

In this class, you are also expected to do online homework for all 65 sections as well as chapter reviews. At 20 minutes each, this amounts to **25 hours** of homework (minimum).

You are also expected to communicate with your instructor and fellow classmates via our Discussion Board for about 30 minutes per week (for a total of **8 hours** during the 6-week session.)

For those adding these hours, there is a minimum of 65.5 hours of scheduled time for learning, or an average of 4.09 hours per week.
